Subject: New Jersey Constituents Urge Leadership on Universal Healthcare

Honorable [Full Name]
[Street Address]
[City, State, Zip]

Dear [Senator/Representative] [Last Name],

We are New Jersey constituents writing as part of a coordinated effort across our communities to urge strong federal leadership on Universal Healthcare.

Across our state – urban, suburban, and rural – families are experiencing the same pattern: coverage that feels unstable, costs that continue to rise, and administrative hurdles that delay care. Even those with insurance often face high deductibles, prior authorizations, and unaffordable prescription prices.

For many of us, healthcare insecurity is not abstract. It looks like:

- Delayed appointments due to cost or network limits
- Surprise bills despite coverage
- Mental health services that are difficult to access
- Prescription medications that strain household budgets
- Job changes that threaten continuity of care

New Jersey residents want a healthcare system that is:

- Automatic and Universal: no gaps in coverage
- Affordable and Predictable: no crushing out-of-pocket exposure
- Administratively Simple: less waste, more care
- Accessible: strong primary care, mental health, and rural capacity

We respectfully ask you to:

1. Publicly champion legislation that guarantees healthcare coverage for every resident.
2. Support reforms that reduce out-of-pocket costs and prescription drug prices.
3. Advance policies that reduce administrative waste and simplify care delivery.
4. Strengthen federal investment in primary care and behavioral health access.
5. Provide a clear update to New Jersey constituents on the legislative path forward this session.

Healthcare stability is foundational to economic security, public health, and human dignity. As a state that values fairness and opportunity, New Jersey can lead the nation in calling for a system that works for everyone.

We appreciate your service and ask you to help make meaningful healthcare reform a priority this Congress.

Respectfully,
